

**Eco-Schools Environmental Review Primary
2021-2022**

Welcome to this year's Environmental Review, before you get started here are some things you need to know:

- To signal your answer, simply place the letter x (or any other letter or symbol) in the relevant yes or no column.
- To calculate your score for each topic, simply count the number of yes answers you have for the topic.
- If you don't know the answer to a question, that is OK, simply move on to the next question.
- You can calculate your total score (out of 30) by adding all of your topic scores together.
- Finally, do not worry if you have any low scores - this just means there are lots of wonderful actions you can complete!

Good Luck!

Things we are doing well:
<ul style="list-style-type: none"> • Water- Every child has their own reusable water bottle. • Healthy Living- We get lots of exercise every day and we have lots of equipment on the playground to use. • Transport- We have Walk to School week to encourage people not to use their car.
Things we could improve:
<ul style="list-style-type: none"> • Biodiversity- We could provide more houses for birds • Waste- We could install a compost bin/wormery. • Global Citizenship- We could host a no electricity day to make everyone aware of the amount of electricity we use. • School Grounds- Some classrooms have plants in their classrooms but not all of them. We could plant more trees to replace ones cut down in the Forest School
This year we have decided to focus our Eco-Council work on:
<ol style="list-style-type: none"> 1. Waste 2. Energy 3. School grounds
